REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: After a review of the prior art of record and of the Applicant's arguments, it is believed that the present invention is novel and non-obvious wherein no reference discloses a pressurized liquid dispensing system comprising a pressurized liquid source to deliver a single pressurized liquid at a high pressure, a liquid dispenser located remote from the liquid delivery source configured to dispense the liquid at a second, relatively low pressure and a pressure reducer device within the liquid line, wherein the pressure reducer comprises a housing and a restrictor disposed within the housing having a single inlet, an outlet and at least one passage formed between the inlet and outlet, wherein the restrictor is configured to impart a series of directional changes to the single liquid without mixing the single liquid with any other substance to thereby reduce the pressure of the liquid to the second pressure. Similar looking devices function to mix fluids and non disclose their use in reducing pressure of the liquids being mixed, while none of the pressure reducing devices disclose the step of imparting a series of directional changes to the single liquid.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
